

'Aromella'

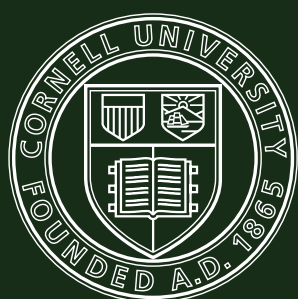

Photos: Jason D. Moore, CTL

'Aromella' is a winter-hardy white wine grape with high potential productivity and excellent aromatic muscat wine characteristics. Wines have notes of pineapple, honeysuckle, citrus peel and floral muscat character. It is a mid-season grape that is recommended for commercial production with potential for use as a varietal or in blends. A portion of the profits from poster sales will benefit Cornell's grape breeding program.
